

302 KAR 10:030. Sampling.

RELATES TO: KRS 260.640

STATUTORY AUTHORITY: KRS 260.640

NECESSITY, FUNCTION, AND CONFORMITY: This administrative regulation prescribes the minimum number of eggs that shall be sampled to determine the grade.

Section 1. Sampling to determine the grade of a lot of eggs in the administration of the egg marketing law shall be in the following proportions:

(1)

Cases in Lot	Cases in Sample
1 case	1
2 to 10 inclusive	2
11 to 25 inclusive	3
26 to 50 inclusive	4
51 to 100 inclusive	5
101 to 200 inclusive	8
201 to 300 inclusive	11
301 to 400 inclusive	13
401 to 500 inclusive	14
501 to 600 inclusive	16

(2) For each additional fifty (50) cases or fraction thereof in excess of 600 cases, one (1) additional case shall be included in the sample.

(3) A minimum of 100 eggs per sample case shall be examined. For lots which consist of less than one (1) case, fifty (50) eggs shall be examined and, in instances where there are less than fifty (50) eggs in a lot, all eggs shall be examined. (Agr: Egg:ln10; 1 Ky.R. 735; eff. 5-14-75.)
